Software Engineer /Full Stack Developer/AI Engineer

PROFILE

Software Developer with over 13 years of professional experience developing mobile applications, IoT systems, backend APIs, and desktop software. Holds a Bachelor's Degree in Computer Science and a Specialist Diploma in Applied Artificial Intelligence from Nanyang Polytechnic, Singapore. Seeking opportunities to use software development experience and AI skills, learn new technologies, and work with a team.

WORK EXPERIENCE

Software Engineer | **Team One Technologies Pte Ltd, Singapore** **Jun 2022 – Aug 2026**

- Developed and maintained Android and iOS applications using Java, Kotlin, Swift, and native SDKs.
- Researched and developed mobile application solutions to support Singapore's National Defense.
- Implemented IoT solutions integrating Bluetooth, Wi-Fi, WebSocket, MQTT, and multithreading for real-time data communication.
- Developed mobile applications with dual-network connectivity, integrating WebSocket APIs, Python algorithms, MQTT messaging, and Raspberry Pi-based solenoid control.
- Developed Python applications for Raspberry Pi sensor integration and C# .NET console applications for data processing and MQTT communication.
- Developed backend APIs using Node.js, JavaScript, MongoDB, and MySQL, used git for version control and code collaboration.

Senior Software Developer | **BC Group Technology, Yangon, Myanmar** **Nov 2018 – April 2022**

- Developed POS Android application supporting both offline and online point-of-sale operations for restaurant
- Developed an app for a rental platform for houses and apartments
- Developed an app for applying and managing part-time crew
- Developed a mobile application for controlling Hitachi elevator systems

Senior Software Developer | **Xan IT Solutions, Yangon, Myanmar** **Feb 2017 – Oct 2018**

- Developed and maintained KBZ Mobile Banking Android Application (for Myanmar KBZ Bank)
- Developed Retail POS Android Application with both offline and online system support

Senior Android Developer | **Code2Lab, Yangon, Myanmar** **Nov 2015 – Jan 2017**

- Developed POS Android NFC tag payment application and print items receipt for restaurant
- Implemented new features in the EPSON POS Android application.
- Built the DOEMAL Android food ordering application.
- Created an Android car parking system application.

Java Web and Android Developer | **Colay Hills, Yangon, Myanmar** **Jul 2013 – Oct 2015**

- Developed and maintained the Colay Hills Auto Mobile website using Java, Spring, JSP, and MySQL Database.
- Developed the Colay Hills Auto Mobile Android application

Java Developer | **Myanmar Information Technology Pte Ltd, Yangon, Myanmar** **Nov 2012 – Jun 2013**

- Developed a Java-based web POS system using Java, GWT, JSP, JavaScript, HTML, CSS, MySQL Server, and Jasper Reports.

SKILLS

Android/iOS Mobile App Development	Azure AI Service, RabbitMQ MQTT	Raspberry Pi integration
Window App Development	AI and Machine Learning Model	Research Solutions
Backend API Development	MVVM, MVP and MVC architectures	Good Teamwork/Quick Learner
IoT Development (Raspberry Pi)	SQL Server, MongoDB, SQLite and ROM	App Testing/CI/CD Pipeline
Java, Kotlin, Swift, Python, C# and Flutter	AngularJS & NodeJS and JavaScript	Agentic AI and Code Vibe
NFC card tag, Bluetooth and Wi-Fi	SDLC and Project Management	Waterfall/Agile Model

EDUCATION

Post Graduate Certificate in AI and Machine Learning (Co-op) – (AIM1) **Expected Completion | Dec 31st 2027**
Fanshawe College, Ontario, London

Specialist Diploma in Applied Artificial Intelligence| Nanyang Polytechnic, Singapore **Apr 2024 - Mar 2025**

Bachelor of Computer Science | University of Computer Studies, Yangon, Myanmar. **Nov 2007 - Sep 2011**

PROFESSIONAL DEVELOPMENT CERTIFICATES

Software Engineer Training Course | ICTTI and JICA	2012
Web Essential and ASP.Net Application | M3WI	2012
Introduction to Machine Learning Course | Auston College	2018

VOLUNTEER EXPERIENCE

- Supported people in need in Myanmar since childhood and contributed to the Mon community while working in Singapore
- Participated in fundraising and donation collection for earthquake and fire victims in Myanmar.

My Mobile App

I have developed this app that provides a Myanmar lunar calendar in Burmese and Mon languages, with Gregorian date conversion from 1920 to 2100.
Android App Play Store: View on google play
